

# ECHEVERIA

Grow your reptile, amphibian, or invertebrate jungle with ReptiFauna™ desert plants.

These plants are perfect for naturally enhancing your animal habitat and are easy to care for.

**Origin:** Central America

**Care Level:** Beginner

**Light:** Full Light

**Humidity:** Dry 0-30%

**Environment:** Desert

**Placement:** Midground

**Water Frequency:** Every two weeks

**Growth Rate:** Slow

### TIPS:

- Water only when substrate is completely dry or when leaves begin to curl/wrinkle.
- Underwatering is better than overwatering.
- Water the substrate and not the leaves.

### TO GET STARTED:

- Prepare the substrate by digging a small two inch hole to accommodate the plant
- Remove the plant from the pot being careful to not damage the roots
- Gently remove as much substrate from the plant and discard the substrate in the trash
- Lightly rinse the plant under de-chlorinated room temperature, or distilled water
- Place the plant in the hole in the substrate
- Fill in the open areas in the hole with substrate until the it covers just up to the base of the plant
- Gently smooth out the substrate
- Water according to care directions above, always using room temperature water
- (Note: only water the substrate and never the leaves of this plant)
