

# FERN

Grow your reptile, amphibian, or invertebrate jungle with ReptiFauna™ tropical plants.

These plants are perfect for naturally enhancing your animal habitat and are easy to care for.

**Origin:** Tropical jungles,  
All over the world

**Care Level:** Beginner

**Light:** Partially Shaded

**Humidity:** Humid 70-100%

**Environment:** Tropical

**Placement:** Midground

**Water Frequency:** 2-3x a week

**Growth Rate:** Moderate

## TIPS:

- Plants grown in more loose substrate may need more frequent watering.
- Overwatering can cause yellow or wilted leaves.
- Do not water if the substrate feels wet below the fern. Wait a few days and check again to resume watering.

## TO GET STARTED:

- Prepare the substrate by digging a small two inch hole to accommodate the plant
- Remove the plant from the pot being careful to not damage the roots
- Gently remove as much substrate from the plant and discard in the substrate in the trash
- Lightly rinse the plant under de-chlorinated room temperature, or distilled water
- Place the plant in the hole in the substrate
- Fill in the open areas in the hole with substrate until the it covers just up to the base of the plant
- Gently smooth out the substrate
- Water according to care directions above, always using room temperature water
