These plants are perfect for naturally enhancing your animal habitat and are easy to care for.

Origin: Central & South America

Care Level: Beginner

Light: Full Light

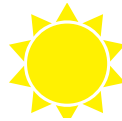

Humidity: Moderate 30-70%

Environment: Tropical

Placement: Midground

Water Frequency: Weekly

Growth Rate: Fast

HUMIDITY:

TIPS:

- Drooping leaves usually indicate too much water, Curling leaves usually indicate not enough water.
- Allow substrate to nearly dry out before watering, then water well.
- Enjoys full lighting, but be sure to keep them at a safe distance as to not brown out the leaves.

TO GET STARTED:

- Prepare the substrate by digging a small two inch hole to accommodate the plant
- Remove the plant from the pot being careful to not damage the roots
- Gently remove as much substrate from the plant and discard in the substrate in the trash
- Lightly rinse the plant under de-chlorinated room temperature, or distilled water
- Place the plant in the hole in the substrate
- Fill in the open areas in the hole with substrate until the it covers just up to the base of the plant
- Gently smooth out the substrate
- Water according to care directions above, always using room temperature water
