

# RUBY PEPEROMIA

Grow your reptile, amphibian, or invertebrate jungle with ReptiFauna™ tropical plants.

These plants are perfect for naturally enhancing your animal habitat and are easy to care for.

**Origin:** Ecuador

**Care Level:** Intermediate

**Light:** Full Light

**Humidity:** Moderate 30-70%

**Environment:** Tropical

**Placement:** Midground

**Water Frequency:** Weekly

**Growth Rate:** Slow

## TIPS:

- Sagging leaves can indicate the plant needs more water
- Water only when the top two inches of substrate is dry
- Can tolerate a variety of lighting except intense direct light

## TO GET STARTED:

- Prepare the substrate by digging a small two inch hole to accommodate the plant
- Remove the plant from the pot being careful to not damage the roots
- Gently remove as much substrate from the plant and discard the substrate in the trash
- Lightly rinse the plant under de-chlorinated room temperature, or distilled water
- Place the plant in the hole in the substrate
- Fill in the open areas in the hole with substrate until it covers just up to the base of the plant
- Gently smooth out the substrate
- Water according to care directions above, always using room temperature water
